When the name Sightline appears in the media, I hope you’ll remember it refers to you, too, because your generous support makes you part of us. It’s a team effort, and thanks to you, 2013—our 20th anniversary—was a banner year.

We (meaning, you) found receptive audiences on every issue we addressed, from fighting coal exports and highway megaprojects to promoting micro-housing and better parking rules. We dug into the finances of Big Coal and found shaky balance sheets, news that sent investors running for cover. We set new records for readership and media attention: every 23 hours all year, on average, our work showed up in a high-quality news story in Cascadia. We left fingerprints—your fingerprints—on 14 noteworthy victories, ranging from the passage of new climate laws in Oregon and Washington to the collapse of two coal-export schemes in Oregon, and from the demise of the couch-poisoning “12-second rule” in California to the end of mandatory phone books in Washington.

One unlikely victory may ultimately prove pivotal. In November, the US Senate revised its filibuster rule by simple majority for the first time, starting the Senate down the path to majority rule. Sightline has been pushing this change since 2010, because a supermajority Senate will never approve the sweeping changes sustainability entails. We’ve been working behind the scenes to stiffen the spines of Northwest senators. You and the rest of Sightline added to the wave that broke the dam.

Thanks to your being part of Sightline, we have the freedom to pursue opportunities that focus on the long term, even obscure but essential procedural changes that few people think about. Thank you for being the “us” of Sightline. Your support makes an enormous difference.

Thank you,

Alan Durning
Executive Director
SIGHTLINE INSTITUTE
Climate legislation passes in Washington: The Washington legislature passed a bill to develop a strategy to reduce the state’s greenhouse gas emissions, specifically considering carbon pricing options.

Sightline series, “Parking? Lots!”, garners over 65,000 page views. Articles from the series were reported at outlets including Grist, StreetsBlog, and Planetizen, and several were written up in Atlantic Cities, The Tyee, Seattle Met, and the Portland Mercury.

“Sightline covers topics that go beyond the scope of sustainability discussions in my professional field. It helps stitch together more elements in the tapestry of environmental and social sustainability.”

Chris Schreiner
EXECUTIVE DIRECTOR, OREGON TILTH

Making sustainability legal wins:
- No more mandatory white pages (WA)
- Neighborhood Safe Streets Bill (WA) passes
- Pay As You Drive auto insurance becomes a reality (WA)

20% increase in web traffic over 2012

Climate legislation passes in Washington: The Washington legislature passed a bill to develop a strategy to reduce the state’s greenhouse gas emissions, specifically considering carbon pricing options.

384 high quality news stories quoted Sightline staff or cited our work, including a front page Wall Street Journal story on our research on laneway housing in Vancouver and a front section New York Times story on the Northwest’s fossil fuel export crisis.

Sightline exposés coal export backer Ambre Energy’s shaky finances

Coos Bay and Port St. Helens coal export terminal proposals CANCELED in Oregon

Twitter audience grew 52% to over 5,300 followers

Facebook audience grew 56% to nearly 2,900 “likes”
When new Sightline board chair Kamala Rao’s husband proposed buying the cheapest 1970s-era condo on the market in Vancouver BC, she balked at first.

Her husband, an architect interested in efficiency and optimizing small spaces, convinced her that renovating the 400-square-foot condo would be worth it. They reorganized the space, turned stairs into storage, and agreed that nothing could enter the condo without something leaving.

They stayed in their tiny urban haven for years. “I loved it. It became freeing not to need a lot of stuff,” Rao said. “It was like being back on the boat we had when I was a kid. I loved how the dining room table turned into the bed and everything was so efficient and there were small spaces everywhere to discover.”

Rao, born to two civil rights activists who met at the University of Washington, grew up camping and hiking across Washington and Oregon. She moved at the age of 11 to Alaska, where “if you’re not going out into the wilderness, you’re going to be pretty bored.”

That love of the outdoors was the foundation for her interest in sustainability. But it wasn’t until after she graduated from college, with a degree in physics and a head for numbers, that Rao realized what she really wanted to do.

“I thought about the biggest contribution I could make to the environment with my career,” Rao said. “And I realized it would be—as I thought of it back then—getting rid of cars. Now I frame it as giving people alternatives to driving.”

Rao, who got a master’s degree in urban planning from The University of British Columbia, now works as a senior transportation planner for TransLink, Metro Vancouver BC’s transportation authority. She’s helped municipalities improve bike infrastructure, develop smartly around transit stations, figure out how to design better bridges, and more.

Her considerable project management skills will come in handy as she leads Sightline’s board of directors for the next two years, and through a strategic planning update. Rao first discovered the organization 10 years ago while researching her master’s thesis on replacing the Alaskan Way Viaduct. Sightline was one of the few voices at the time, Rao remembers, questioning whether Seattle needed a freeway running through its downtown.

Since becoming a Sightline trustee in 2009 and joining the board of directors in 2011, the planner in her has appreciated the staff’s organization and focus, as well as their knack for translating data and research into compelling charts, maps, and storytelling.

“It was just the best run nonprofit I’d ever been involved with, so that’s kept me really excited about the work we do,” she said. “And Sightline has the rare ability to do analysis and communicate it really well.”

Rao, whose father is Indian and whose mother is white, has also led Sightline’s board diversity committee since 2012. She’s helped the organization seek to more actively engage communities of color, examine content choices through that lens, reach out to new partners, consider its own hiring practices, and learn from new relationships. That work, Rao said, has had an impact on her too.

“There’s not a whole lot of diversity in the urban planning and transportation engineering fields, and you need a diversity of voices to really understand the issues,” she said. “The work we’ve done at Sightline has made me much more of an advocate because I’m thinking about it all the time. And it’s made me a lot more confident in talking about it.”

Rao also appreciates the utility of Sightline’s research. Just the other day, after debating with a colleague about how valid their traffic models would in 30 years, she sent him a batch of Sightline graphics on flawed and overoptimistic traffic forecasts.

“I said, ‘I bet these people were pretty confident about their models, too,’” Rao said. “That work is great, and something I use on a regular basis.”
Statement of Financial Position
December 31, 2013

ASSETS
Cash and investments $ 2,166,297
Accounts receivable 10,426
